AAP Apple Academic Press

Exclusive co-publishing with CRC Press, a Taylor & Francis Group

Call for Chapter (s)

Book Title: Application of Deep Learning Methods in Healthcare and Medical Science

Editors

Department of Systemics, School of **Computer Science**, University of Petroleum and Energy Studies, Dehradun, India.

Department of Computer Science and

Engineering, Indian Institute of

Information Technology, Dharwad,

Karnataka, India

Dr. Prashant Kumar

Department of Computer Science & Engineering, Dr. BR Ambedkar National Institute of Technology, Jalandhar, India

Dr. Rohit Tanwar

Dr. Neha Nandal

Department of Computer Science and Engineering, St. Martin Engineering College, Dulapally, Hyderabad, India

Dr. Malay Kumar

Submission Guidelines

Original, unpublished and relevant chapters are invited for the book, "Application of Deep Learning Methods in Healthcare and Medical Science". All chapters must be original and not simultaneously submitted to another book, journal or conference. Abstract should be of 150-200 words, written naturally but including all key words within the abstract. All Submissions should be done via easychair at: https://easychair.org/conferences/?conf=adlmhms2020

Publications

The book will be published by AAP, co-publishing with CRC Press, Taylor & Francis Group. The complete book will be submitted to SCOPUS and Web of Science for Indexing.

Deadlines

Abstract Submission Deadline:	January 15, 2021
Acceptance Notification:	January 31, 2021
Full Chapter Submission:	March 15, 2021
Final Submission:	May 31, 2021

Subject areas of interest:

- Medical Imaging Analytics and Diagnostics
- Image Segmentation, Tissue Recognition and Classification
- Deep Learning-Based Computer-Aided Diagnosis System
- Drug Discovery and Precision Medicine
- Clinical Decision Support and Predictive Analytics
- Natural Language Processing for Medical Science
- Treatment and Prediction of Disease
- Deep Learning for Electronic Healthcare Record
- Deep Learning Methods for Breast Cancer Detection
- Deep Learning Methods for Diabetic Detection
- DNA Classification
 - Diagnosing Coronary Artery Disease
 - Motion Artifact Correction, Detection and Removal
- Deep Learning Methods for Image Dehazing
- Deep Learning Methods for Medical Text Analysis
- Deep Learning Methods for Medical Speech Recognition
- Deep Learning Methods for Medical Speech to Text Conversation
- Deep Learning Methods for IoT and Wearable Devices
- Robotics Assisted Surgery
