AttLis 2022

The <u>Att</u>entive <u>Lis</u>tener in the Visual World

Storrs, CT, USA   October 27-28

Invited speakers

Elika Bergelson
Duke University

Craig Chambers
University of Toronto

Falk Huettig
Max Planck Institute for Psycholinguistics & Radboud U.

Mike Tanenhaus
University of Rochester

Mila Vulchanova
Norwegian University of Science & Technology

AttLis addresses multi-modal cognition with an emphasis on the interaction between language and vision. More specifically, there is a central focus on how attentional and visual processes interact with spoken and written language processing. Why are attention and vision crucial to language comprehension? How does each inform and mediate the other in moment-to-moment processing and in language development over the lifespan?

This will be the seventh AttLis meeting, and the first in North America. This meeting was originally planned for March, 2020, but was postponed.

Abstract submission deadline: 6 July 2022
