ABOUT M'SILA:

M'Sila is a province (wilaya) of northern Algeria. It has a population of 1 million people and an area of 18,718 km², while its capital, also called M'sila, home to M'Sila University, (Med boudiaf University), has a population of about 100,000. Some localities in this wilaya are Bou Saada and Maadid. Chott El Hodna, a salt lake, crosses into M'Sila.

M'sila was the location of the first village constructed as part of a government-run program to transition nomadic Algerians to sedentary life using local materials. The village now complete, was dubbed Maader and consists of houses, public, and trading areas, and a mosque. Today it is much more developed with many companies, business offices, religious centers and schools.
