Organizers

Overview

The International Conference on Informatics in Economy is one of the first scientific events on this subject in Romania and during the last years has gained international scientific recognition. At the national level, it remains one of the most important scientific events that gather the entire Romanian Economic Informatics community. The goal of this conference is to bring international authors together on challenging research topics. The IE 2023 Conference will be held in Bucharest between 25-26 May 2023.

Topics of the conference

The Organizing Committee encourages submissions of papers in the following topic areas:

- Machine Learning Theory and Applications
- Big Data Management, Processing and Analytics
- Smart Cities and Sustainable Communities
- Cloud, Distributed and Parallel Computing
- Cybersecurity and Critical Infrastructures
- IoT, Mobile and Multimedia Solutions
- Quantitative Economics
- Digital Business and e-Transformation
- IT Deployment in Cultural Institutions

Submissions

Papers should have a length of 8-10 pages. The paper shall include an introduction on the current research, original solutions, experimental results analysis, conclusions and references. It is allowed only one paper per author. The paper template is available on the conference website.

Publishing

The conference papers will be sent for review to Springer and the accepted papers will be published in the Conference Proceedings series Smart Innovation, Systems and Technologies by Springer.

In addition to Conference Proceedings, the authors are invited to publish an extended paper in thematic issues from several distinguished international, indexed, scientific journals in their respective topics:
