

IC-AMME & LSCM 2021

CALL FOR PAPER

The 2nd International Conference on Automotive, Manufacturing, and Mechanical Engineering & The 4th International Conference on Logistics and Supply Chain Management

Conference Topic

Enhancing Sustainability and Value-Added Creation in Smart Industries

Workshop Date

01st October 2021

Conference Date

02nd October 2021

Conference Topic

United Nations Industrial Development Organization has devised the concept Green Industry to set sustainable industrial development in the context of new global sustainable development challenges. On the other hand, digitization of manufacturing in Industry 4.0 era is an example of the disruptive changes we are facing now. These changes may become opportunities to improve production efficiency by optimizing the use of natural resources, decrease the impacts on environment, and minimize risks to humans. This conference focuses on concepts, ideas, and practices that advances the sustainability and value added in manufacturing and services industry of tomorrow.

The conference topics include, but not limited to the following subjects:

- Automotive Engineering
- Mechanical Structure, Design and Vibration
- Manufacturing
- Energy Conversion
- Green logistics
- Eco-supply chains
- Green industries
- Human Factors for sustainability
- Sustainable product design and development
- Sustainable services
- Industry 4.0
- Industrial management
- Supply chain management trends and best practices
- Logistic excellence
- Human factor in logistics
- Industrial engineering
- Operations management
- Modelling, simulation, and optimization in logistics and supply chain management
- Business Intelligence in Industry
