

Tenth International Workshop Modelling and Reasoning in Context (MRC)

@FAIM 2018, Stockholm, Sweden, July 9-19, 2018

Paper Deadline: Friday May 18, 2018

Join us in Stockholm

MRC aims to bring together scientists and practitioners from different communities, both industry and academia, in order to study, understand, and explore issues surrounding context and to share challenges, techniques and success stories across different research and application areas in a cooperative, friendly environment.

MRC invites papers on different aspects of context, for example on modelling of and reasoning with context, or the role of context in applications. We particularly invite contributions on autonomy and context as well as machine learning of parameters of context. We explicitly invite contributions from other fields of study in order to further trans- and interdisciplinary approaches.

A balanced mix of peer reviewed paper presentations, organised panel discussions, industry input, and open discussion time should make the workshop a dynamic and attractive venue.

Chairs

Jörg Cassens

IMAI, University of Hildesheim,
Germany

Rebekah Wegener

RWTH Aachen University, Germany
and Audaxi, Sydney, Australia

Anders Kofod-Petersen

Alexandra Institute,
Copenhagen, Denmark
and NTNU, Trondheim, Norway

Dates

Papers due	Friday May 18
Notification	Friday June 15
Camera-ready	Friday June 29
MRC Workshop	July 13/14/15 (half day, tbd)
