Publication Fee

Payment Detail	Local Presenter	International Presenter
Non-student	IDR 1,000,000	USD 100
Student	IDR 750,000	USD 75

Topic

The era of the Industrial Revolution 4.0 has entered a new chapter with the Covid-19 pandemic conditions. In this era, technology has become an inseparable part of all sectors of life, one of which is the agricultural sector. Agriculture is the mainstay of the sector during the pandemic conditions. The city center is an area that requires food supply from rural areas. As a result, rural areas need to be empowered and developed so that they are more familiar with the technology so that agricultural management can pay attention to the ecology of the surrounding environment. Besides, awareness of doing business based on farming from upstream to downstream needs to be improved in the current era so that it can improve the welfare of life and open jobs for others.

Scopes

-  Agricultural Management
-  Agriculture and Rural Development
-  Sustainable Agriculture and Agribusiness
-  Agricultural Finance and Cooperatives
-  Agribusiness and Agroindustry
-  Human Resource Development
-  ICT for Agriculture Development

Facilities
