About the Conference

The pace of technological advancement can easily be seen all around. The technology now days have spread its root in such a way that in almost everything you will find the involvement of a technology. Irrespective of the specialized engineering domain, in every few days a new technology pops up. In the modern era, the penetration of technology in our life is deepening day by day and our day to day life has become almost dependent on one or the other technologies. In such scenarios, it becomes very important that those technologies must be trust worthy. This conference (ICTT'17) is aimed to provide a platform to the researchers from around the world to share their works in relevance to the recent technologies and its trustworthiness. This event also aims to provide an opportunity to talented scholars from schools to share their views by contributing into the **student symposium**. Added attraction of ICTT'17 will be the **workshop on "Internet of Things (IOT)".**
